

## Our Environmental Policy

Andron Contract Services recognises that in pursuing its business objectives, it has a responsibility and it should take the opportunity to protect the environment through control over its activities. This statement applies to all activities within the control of Andron.

Andron Contract Services Ltd will manage its operations in ways that are environmentally sustainable and economically feasible and provide appropriate environmental education programmes for its staff and employees.

Andron has set the following objectives:

- To promote environmental policies and practices throughout the Company
- Comply with the requirements of relevant legislation
- To use energy efficient lighting and equipment
- To encourage environmentally responsible procurement of goods and services
- To encourage recycling of waste where appropriate
- To reduce and, where practicable, prevent pollution through the use of water based and environmentally friendly products
- To use low emission vehicles through out the organisation to minimise the impact on the environment
- To raise awareness of staff and employees of the Company's environmental impact, activities and performance and to promote individual good practice
- To encourage clients, suppliers and organisations to contribute towards a better environment through recycling, use of energy efficient and environmentally friendly products
